

**Educ - Deaf/Blind, School for the
Idaho School for the Deaf and the Blind**

Description:

Provide appropriate educational opportunities by means of residential and regional outreach programs for the hearing and/or visually impaired children of Idaho to enable them to acquire skills and knowledge necessary to reach their intellectual, physical, social, emotional, and vocational potential. Ultimate goal is to enable these students to develop skills and acquire training that will enable them to attain and retain competitive employment so they too may become productive taxpaying citizens and contribute to the economic growth of the state rather than becoming dependent upon social welfare programs of the state or federal government.

Major Functions and Targeted Performance Standard(s) for Each Function:

1. Develop, implement, and modify instructional programs for deaf, blind and deaf-blind students at the RESIDENTIAL program level using the Individualized Educational Program model as prescribed by (IDEA) and Idaho Code.

A. Provide programming for multihandicapped students.
